A 360° View of Your Students' Progress

The Problem

Student support organizations often lack ready access to best-in-class cloud solutions due to financial and personnel constraints. This forces organizations to store and manage crucial student data in Excel spreadsheets and other one-size-fits-all databases. With so many data silos, it's difficult to get a student's full story, and nearly impossible to fulfill the arduous reporting tasks required for Board members, funders, and other stakeholders.

The CoPilot Solution

Say goodbye to data silos, Excel spreadsheets, and one-size-fits-all solutions!

CoPilot—powered by College Forward—provides organizations a state of the art, cloud-based student information system built on the Salesforce.com platform—a global leader in cloud solutions. With over a decade of student support experience, College Forward has built your one-stop, 360-degree student profile, allowing users to easily access academic, financial aid, and crucial student data when it matters most.

### Join a Community of Industry-Leading Programs

By leveraging the power of CoPilot, you not only receive a best-in-class student information system, you are joining a community of other industry-leading college access and completion programs. CoPilot provides organizations the ability to connect, problem-solve, and even recommend new features for future editions.

Get to Know CoFo

College Forward (CoFo) is an Austin, TX-based non-profit that specializes in coaching motivated, underserved students to achieve the benefits of higher education and a college degree. Student data tracking has always been core to CoFo's programming. In 2010, we took a step back and realized our staff were in desperate need of a database upgrade. We could no longer provide top-quality, data-informed student services using Excel spreadsheets and other one-size-fits-all databases. CoFo has spent years designing, testing, and optimizing CoPilot. We are excited to share our affordable, user friendly, and customizable solution to like-minded organizations like you!

Student Profiles

CoPilot reduces the hassle of cleaning, or summarizing your data. Each profile is personalized for each end user in your organization, restricting access when necessary and following strict regulatory practices. Our data collection fields are completely personalizable to match your programming needs and help your end users collect clean data with built-in processes. Our success indicators notify you when your students need you the most.

Customizations

Our students earn their Milestones, your organization might identify it as a roadmap to success. Whatever you call it, CoPilot can track it. Whether it's College and FAFSA applications, Program or Class Attendance, or Enrollment or Transcript Data, we help you track your student's education lifecycle in one location. Our Partner Experience Team will help you integrate your programming into CoPilot and work with you, year after year, to build and maintain your dream data solution.

Reporting and Dashboards

Student support programs need to pinpoint their success, analyze their "pain points", and view the progress of individual students. Leveraging the power of the Salesforce.com platform, partners can create custom reports in an easy-to-use report builder to access the data you need to keep your organization sharp.

Implementation Training & Support

College Forward ensures a successful launch into CoPilot, offering all organizations on-boarding support, access to online video tutorials, and ongoing webinar trainings. Your success is key. CoFo will build a custom implementation plan to meet your programs' needs.

"The biggest benefit of CoPilot is the amazing team you get to work with and the level of support they provide. As part of our implementation, our Salesforce Admistrator received 1-on-1 coaching so we could become experts and do most of our own building and customization. CoPilot also lead trainings for our entire team once we were ready to go live. Most importantly, CPilot provides you with unlimited support year-round. Their team always responds to our questions and will walk you through any question you have."
